

# Indy Comparison Guide

## Granite Ind. INDY U.S. INDY 606 6' Single

- Powder coated paint. Standard color yellow frames, and yellow braces. Other colors are available.
- Squeeze locking thumb wheel brace system. The thumb wheel screws into a threaded nipple for positive lock. Additional self-storing snap pin provides a dual-locked brace.
- Units stack and lock w/snap pin for additional heights. Drilled inserts allow units to be pinned together and prevents uplift per OSHA code.
- Modular Guard Rail Ends mount on the tower frames. Modular side rails attach with squeeze locking thumb wheel. Toe board and clips are included. Access platform from both ladders.
- All legs are drilled on two sides. No right and left hand frame assembly required.
- Platform level adjusts in 4" increments.
- 1,000# distributed capacity walkboard of 5/8" plywood with heavy press fit edge banding. Handle holes on each side for ease in handling. No staples or rivets to come loose.
- Four platform alignment pins, assure that the platform is level and secure. When adjusting the platform height, the platform remains in the brace rail.
- Four spring loaded retaining clips hold the platform in place and prevents uplift from the brace rails. Can not be kicked out of position.
- Each unit comes with four 250 lbs. capacity 5" swivel caster with dual brakes to prevent both rolling and swiveling when in use. A compression ring caster stem retains the caster in the leg. A snap pin is also included.
- 20" outrigger attaches with 2 snap pins and locking thumb screw. (5" casters sold separately).
- May be set up for stairwell applications. Always remove casters when used on stairs.
- Arm brace corner supported with a tubular steel welded brace member.

## PERRY SCAFFOLDS 660 6' Single

- Powder coated paint all yellow.
- Positive Engagement Locking System. The thumb plate screws into a threaded nipple to positively prevent the pin from backing out.
- Cannot lock together - advertised as stackable.
- One piece Guard Rail Ends mount on the tower frames. Side rails attach with squeeze locking thumb wheel. Toe board and clips are included. Access platform from one end only.
- Perry legs are drilled on only one side, Sonny on two.
- Platform level adjusts in 4" increments.
- 1,000# distributed capacity walkboard of 5/8" plywood (Perry-stapled edge banding) (Sonny-rivet edge banding).
- Not available
- Not available
- Stack pin not drilled.
- Packages come with 5" caster with weight-over-center position for positive balance and lock while the scaffold is in use. A compression ring caster stem retains the caster in the leg. Neither stem nor caster drilled for snap pin. 20" outrigger attached with Positive Engagement Locking System. Due to one side only leg hole design on the Perry unit, both right and left outriggers are needed.
- Unit can be used on stairs (with casters removed).
- Arm brace supported with welded angle iron.
