

Snappy Comparison Guide

Granite Ind. SNAPPY SP-6 6' single unit

- Powder coated paint. Standard color yellow frames, and gray braces, other color combinations are available.
- G-Lock ergonomic lock is spring loaded to keep it in locked position at all times except when depressed for adjustment. Additional self-storing snap pin provides a dual-locked brace system. Straight-line pull will not rotate to catch or unlatch prematurely.
- Units stack and lock with snap pin for additional heights.
- Guard rail mounts in arm brace sockets with non-restricted inserts making assembly easy. Guard rail stays with the platform at all times. One panel consists of one side and one end. Two sections make a complete guard rail with end swing gates for easy access to the platform.
- Platform level adjusts in 2" increments.
- 1,000# distributed capacity walkboard of 5/8" plywood with heavy press fit edge banding. Handle holes on each side for ease in handling. Walkboard is reversible.
- Four platform alignment pins, when in place, assure that the platform is level and secure. Unit stays together when adjusting the platform.
- Two spring loaded retaining clips hold the platform in place and from lifting from the brace rails. Can not be kicked out of position.
- Stack insert pin with hole for fastening the top unit with the base unit with a snap pin.
- Each unit comes with four 220 lbs. capacity 5" swivel caster with dual brakes to prevent both rolling and swiveling when in use. A snap pin to fasten the caster to the unit is supplied.
- 20" outrigger attaches with 2 snap pins and thumbscrew tightens unit. (5" casters sold separately).
- May be set up for stairwell applications. Always remove casters when used on stairs.
- Arm brace corner supported with a tubular steel welded brace member.

bil-jax, Inc. MULTI-PURPOSE ST-MP6-0 6' single unit

- Powder coated paint all yellow.
- Spring activated lock system. No loose parts.
- Units stack and lock together for additional heights.
- Unique design allows guard railing to stay at platform level at all times. One panel consists of one side and one end.
