

Granite security fencing is made from heavy duty steel. The steel is constructed and shaped to provide maximum strength and protection. The sections are easy to combine together, creating a versatile fence that can be used in many applications.

The increased security can be helpful for protecting job sites or barricading equipment in a warehouse. Popular among foreman and contractors, this durable and affordable fencing is built for use indoors or outdoors. The galvanized finish protects the steel and helps prevent rust.

**COMPONENTS LIST:**

50212	6' H x 8' L Section
50213	8' H x 8' L Section
50214	Foot
50215	Connector
