Rear Locking Brake

Removable Key

Joystick Controller

Alignment Pins

Improve Productivity - manpower is enhanced over stepladders and standard scaffold in many cases by reducing the time wasted by moving devices and climbing up and down.

Easy Transport - The Power Snappy can be broken down and transported in the back of a pickup truck, and can easily be moved by two people.

It Fits - Move from floor to floor on multi-story buildings via elevator, and drive it right on through doorways. Something not possible to do with a scissor lift.

Powerful Electric Motors - The Power Snappy is driven by two electric 24v hub motors, making it environmentally friendly. There's no emissions and virtually no noise.

Integrated Brake System - The brake system is an auto-locking. This means that when the throttle is off, the Snappy automatically has the brakes applied.

Easy Charging - Easily charge the Snappy via a standard 110v wall outlet

24v System - the Power Snappy runs off of 2 12v batteries in series. The battery pack is 35 amp/hr.

Loaded with Safety features - Integrated lock-out switch, auto locking brake system, soft start and stop and complete guard rails are standard on all models. G-pin and snap pin technology secures the arm braces on the power snappy.

IT IS THE IDEAL WORK PLATFORM FOR:

- Electricians
- Painters
- Maintenance personnel
- Schools
- Hospitals
- Office Buildings

MODEL M

SPECIFICATIONS - MODEL M (18711)
