

Granite security fencing is made from heavy duty steel. The steel is constructed and shaped to provide maximum strength and protection. The sections are easy to combine together, creating a versatile fence that can be used in many applications.

The increased security can be helpful for protecting job sites or barricading equipment in a warehouse. Popular among foreman and contractors, this durable and affordable fencing is built for use indoors or outdoors. The galvanized finish protects the steel and helps prevent rust.

Fence storage rack holds up to 20 of our 6' fence panels. Includes 2 swivel and 2 fixed non-marking casters.
